"If you are not designing your systems and not setting up your business such that you can get the best people working together wherever they are, you're going to have problems. Technology like the cloud-based **3D**EXPERIENCE platform can help you get there. It made it drastically faster to share design changes and gave us instant visibility into who is doing what. And, we've just scratched the surface. There is so much more to explore, especially when it comes to connecting design with the other steps in product development."
